COCOM Document No. 3697B

COORDINATING COMMITTEE

MEMORANDUM BY THE ITALIAN DELEGATION

4248441

EXPORT OF THORIUM NITRATE TO CZECHOSLOVAKIA.

The Italian authorities have received a request concerning the export to Czechoslovakia of 12 Kgs of thorium nitrate covered by Item 1 (g) of the Atomic Energy List, to a total value of about \$ 133.

This product is intended for Chemapol in Prague and will be used as a pure agent for laboratory chemical reactions.

The Italian authorities wish to authorise the export of this product as an ad hoc case; they are of the opinion that the quantity requested is such that this export may be regarded as having no strategic importance and they would be glad to have the views of Member Governments on this proposal within 18 days from the date of this request.
